

The luxury of control

Smart Systems for Home Entertainment, IT and Security

ICON CONNECT

London - Monaco

Audio Visual

Whether you love music, movies or TV shows, we have elegant stylish solutions to compliment the most beautiful interiors.

This requires high quality video, detailed accurate audio and above all ... Ease of Use.

Our systems enhance your listening and viewing experience, with the latest technology to make sure the entertainment is entertaining !

Screens and speakers as contemporary works of art, or artfully hidden within the interior to be revealed automatically as the music plays.

Lights and Blinds

Managing light, either natural or artificial, is essential to the ambiance of a home.

With our lighting control design, using silent blinds, curtains and pre-set lighting scenes such as Welcome, Morning, Evening or Cocktail, you are able to transform the mood of a room with a simple touch.

Climate Control

The correct room temperature turns a home into a haven.

Whether it is shelter from a chilly New England dawn or the brutal summer heat, we provide convenient integrated control of your climate management systems.

Security

Situation awareness brings peace of mind.

Your safety is of paramount importance.
We supply the latest systems and can install CCTV and access control to empower the home owner with a simple but effective intruder deterrent - giving you peace of mind.

Control systems

At the core of everything we do is a simple but powerful control interface based on the familiar iPad.

Our philosophy is to minimise button presses. Watching your favourite TV channel is as simple as selecting <TV> <Channel> et voila!

We can combine the iPad controls with stylish programmable lighting keypads providing a familiar wall mounted “switch” in a variety of high quality finishes to compliment any interior.

Icon ***Control***

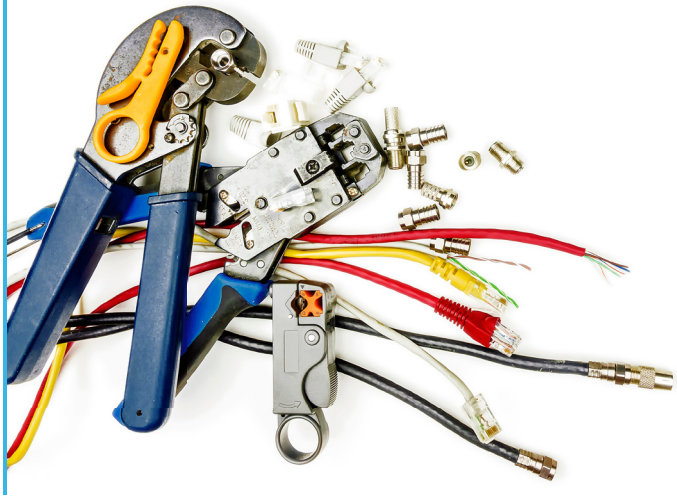
Quick to learn, simple to operate and elegant to behold.

CRESTRON CRESTRON HOME LUTRON Control4

IT

Internet connectivity has become the single most important service for both private and business needs.

The “Home Network” is also the connectivity grid on which the majority of our systems communicate. This means that the IT services installed must be of the highest quality to ensure a reliable framework for WiFi, Internet and system maintenance.



Sentinel

Sentinel Care

Once your system is installed, we will continue to look after you. Our Sentinel Care service offers ongoing maintenance, with different levels to suit your needs.

We can also provide enhanced tailored packages including predictive maintenance “Health Checks” to ensure all systems are running efficiently

Icon Hotline

Whilst at home, our team are on-hand to ensure we provide a fast response to your technical questions.

Icon Remote & Monitoring

Each Icon Connect system includes Icon Server. This is our on-board “Toolbox” for system control, administration, maintenance and management.

Icon Health

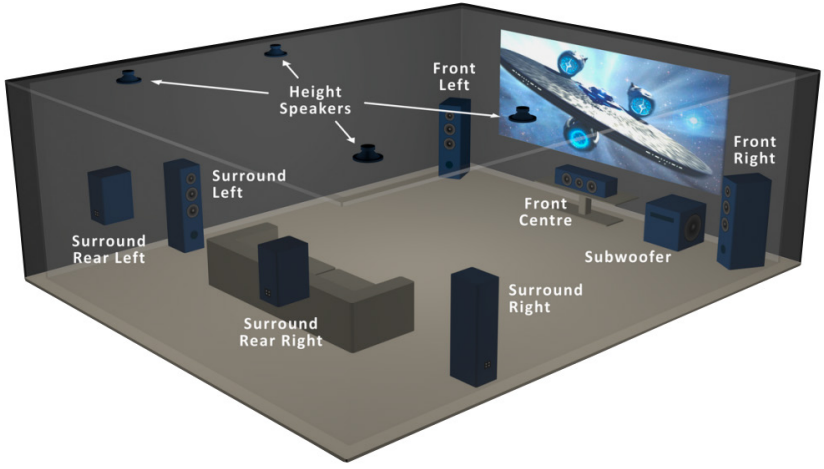
This service includes a 1 or 2 day annual engineering visit by engineers in order to rectify any minor faults where achievable in the time frame. We will also perform a full system operations test and supply a comprehensive report, together with any suggested updates - guaranteeing complete peace of mind.

Icon *Cinema*

Think of your new home cinema as an enduring high-quality audio and video installation to immerse yourself in a movie. Using proven procinema technologies, home cinema transports the excitement of the big screen experience to your home.

We can work with you to customise the system precisely according to your taste and budget.

This means jaw-dropping AV performance in surroundings as comfortable as any in your home, using your choice of fabrics, décor and seating arrangement. In this way your cinema is designed to be as unique and personal as your home itself.



50 people | *39* years | *500+* projects

With offices in the United Kingdom and Monaco, Icon Connect is a world leader in bespoke design, supply and installation of “Smart Systems” for Super-homes and Super-yachts.

Our client focused business philosophy has allowed us to grow into an organisation looking after multiple worldwide assets, ranging from homes in London, Monaco, Mainland Europe and the Mediterranean islands to many of the world’s largest Super-Yachts.
