

CASE STUDY RESIDENCE

One Monte Carlo - Monaco

BRIEF

Simple Audio / Video & TV distribution system for modern 3 Bed apartment in Monaco.

Client uses the property infrequently so the solution was to include regular maintenance contract for system up-keep and to ensure full operability at all times

RESPONSE

Icon Connect supplied a fully integrated video distribution system using Crestron NVX to share a single IPTV Decoder to all rooms.

Due to all rooms having glass curtain walls, TV's were paired with B&W Formation soundbar and sub on a custom stainless steel floor stand by Future Automation.

SUPPORT

The property was delivered in a short timeframe together with monthly "Sentinel" maintenance contract for regular system health checks.

Sentinel Includes:

- ◆ Monthly check of WiFi & TV functionality
- ◆ Software & Firmware updates
- ◆ Visit report for client's Family Office
