The luxury of control

Smart Systems for home Entertainment, IT and Security

ICON CONNECT
AUDIO VISUAL  IT SECURITY

London  Monaco
Whether you love music, cinema or TV shows, we have elegant, stylish solutions to compliment the most beautiful interiors.

Entertainment should be an enriching experience. This requires high quality video, detailed accurate audio and above all ... ease of use.

Movie and music libraries, multi-language TV, iTunes / Airplay or existing record collections are all available.

We work with you to develop a bespoke system design based on your brand preference, performance expectations, aesthetic tastes and budget.

Screens and speakers as contemporary works of art, or artfully hidden within the interior to be revealed automatically as the music plays.
Situation awareness brings peace of mind.

Your safety is of paramount importance. We supply the latest systems and can install CCTV and access control to empower the home owner with a simple but effective intruder deterrent - giving you peace of mind.

Lights & Blinds

Managing light, either natural or artificial, is essential to the ambiance of a home.

With our lighting design service, using silent blinds, curtains and pre-set lighting scenes such as Welcome, Morning, Evening or Cocktail, you are able to transform the mood of a room with a simple touch.

Climate Control

The correct room temperature turns a home into a haven.

Whether it’s shelter from a harsh winter storm or the brutal summer heat, we have the technology to ensure you maintain a constant level of comfort, including easy to use HVAC systems and underfloor heating.
Control systems

At the core of everything we do is a simple but powerful control interface based on the familiar iPad.

Our philosophy is to minimise button presses. Watching your favourite TV channel is as simple as selecting "TV <Channel>" et voilà!

We can combine the iPad controls with stylish programmable lighting keypads providing a familiar wall mounted "switch" in a variety of high quality finishes to compliment any interior.

Quick to learn, simple to operate and elegant to behold.

Internet connectivity has become the single most important service for both private and business needs.

The "Home Network" is also the connectivity grid over which the majority of our systems communicate. This means that the IT services installed must be of the highest quality to ensure a reliable framework for WiFi, Internet and system operation and maintenance.
Once your system is installed, we will continue to look after you. Our Sentinel Care service offers ongoing maintenance, with different levels to suit your needs. We can also provide enhanced tailored packages including predictive maintenance “Health Checks” to ensure all systems are running efficiently.

Whilst at home, our team are on-hand to ensure we provide a fast response to your technical questions.

This service includes a 1 or 2 day annual engineering visit by engineers in order to rectify any minor faults where achievable in the time frame. We will also perform a full system operations test and supply a comprehensive report, together with any suggested updates - guaranteeing complete peace of mind.

Each Icon Connect system includes Icon Server. This is our on-board “Toolbox” for system control, administration, maintenance and management.
With offices in UK and Monaco, Icon Connect is a world leader in bespoke design, supply and installation of Smart Systems for Super-homes and Super-yachts.

A Client focused business philosophy has allowed us to grow into an organisation looking after multiple worldwide assets, ranging from homes in London, Monaco, Mainland Europe and the Mediterranean islands to many of the world’s largest Super-Yachts.
