Smart Systems for
Yacht Entertainment,
IT and Security

Heesen, 51m. Full integration of audio & video systems including iPad control, Crestron and Bang & Olufsen remotes, together with a bespoke 3m LED video wall. Photo Credit Heesen.

Audio Visual Installations

Whether you love music, cinema or TV shows, we have elegant stylish solutions to compliment the most beautiful interiors.

Entertainment should be entertaining!
This requires high quality video, detailed accurate audio and above all ... Ease of Use.

Our systems enhance your listening and viewing experience, with movie and music libraries, multi-language TV, iTunes / Airplay or even existing vinyl record collections!

We will work with you to tailor your systems, based on brand preference, performance expectations, aesthetics and budget.

Damen, 74m. Full technology solution for one of the largest "limited edition" Amels launched to date Systems included full AV/IT security, Antennas and a spectacular outdoor cinema .

Climate Control

The correct room temperature turns a yacht into a haven.

Whether it is shelter from a chilly New England dawn or the brutal summer heat, we provide convenient integrated control of your climate management systems.

Lights & Blinds

Managing light, either natural or artificial is essential to the ambiance of a room.

Using silent blinds and curtains and pre-set lighting scenes such as Welcome, Morning, Evening or Cocktail, you are able to transform the mood of a room with a simple touch.

Security

Situation awareness brings peace of mind.

Your safety is of paramount importance to us. We continually monitor the market for the latest CCTV and access control solutions to empower your crew with simple but effective security systems... putting you in control!

Control systems

At the core of everything we do is a simple but powerful control interface based on the familiar iPad.

Our philosophy is to minimise button presses so watching your favourite TV channel is as simple as selecting <TV> <Channel> et voila!

We combine the iPad controls with stylish programmable lighting keypads providing a familiar wall mounted "Switch" in a variety of high quality finishes to compliment any interior.

IT

Internet connectivity has become the single most important service for both personal and business needs.

The “Yacht Network” is the connectivity grid on which all of our systems communicate. This means that the IT infrastructure must be of the highest quality to ensure reliable WiFi, Internet, Video Conferencing, Streaming, Control and System Maintenance.

Services

We provide a comprehensive support structure for your 4G/5G, VSAT, TV services, Inmarsat and technical support needs all around the world.

Our independent expertise ensures you receive the most suitable services for your cruising profile at competitive rates.

From research to contracting, we guide you every step of the way, wherever you are in the world.

VSAT & 4G/5G

Whether you're checking emails or streaming in Ultra HD, we provide expert guidance to ensure you have the most efficient and cost-effective connectivity solution based on your cruising area and onboard needs.

Our solutions include: VSAT per day; 4G/5G with global and local eSIMs; bandwidth bonding; short term upgrades; FBB, SAT C, Downgrades and lay-up plans for cost savings when offline.

TV STREAMING SERVICES

Stay up to date with your favorite shows, live sports, and international channels while cruising. Access a wide range of services including Sky Stream (UK & Italy), DirecTV Stream, IPTV (UK, Arabic, and more). Wherever your journey takes you, your entertainment travels with you.

STARLINK

Icon Connect will assess each yacht individually and recommend the best route to adopting Starlink. We work through trusted partners to ensure 24/7 support and dual subscriptions for uninterrupted service.

As part of the process, you'll likely need assistance with:

- Antenna installation
- Onboarding and configuration
- Network integration

We're here to make the transition smooth, so you can stay connected, wherever you are.

Sentinel

Sentinel Care

Whilst at sea, our team are on-hand to ensure we provide a fast response to your technical questions. Personalised assistance from experts who are focused on customer care.

We also provide enhanced tailored packages including predictive maintenance "Health Checks" to ensure all systems are in top shape prior to cruising.

IT Support

Your ETO/Engineers need qualified IT support to assist with yacht computing systems. We provide managed IT services including Ships Servers, Workstations, Licencing and End-Point-Management.

We can also provide an end-to-end Cyber solution, from IMO aligned Network Audit and Vulnerability Assessment to Crew Training and a Managed Detect and Response service.

Cyber Security

Statistics show that yachts with weak network security are 38-50% more likely to suffer a cyber attack.

Our managed detect and response service continuously scans your network and IT assets for unusual activity.

Any irregularities are investigated and neutralised by the SOC team to ensure your IT environment remains clear of Cyber threats before they become a problem.

Over 35 large yacht projects delivered in the past 5 years including new builds and refits
